SUMMARY

Motivated Marine and software engineer with a strong foundation in C#, SQL,.NET Framework, HTML, JavaScript, and Python seeking a challenging position to leverage my skills and knowledge in a professional environment. I believe in the continuation of education and always learning new skills and gaining valuable experiences through hard work.

SKILLS

C#; GIT; Python; JavaScript; SQL

EXPERIENCE

Simulated car lot
C#

I developed a Car Lot Simulator in C# that utilizes classes and inheritance. The program effectively manages an inventory of existing cars and tracks the addition of new cars. This project demonstrates my proficiency in object-oriented programming and efficient inventory management within the context of a car lot simulation.

Automated Email Newsletter
Python

Created an Automated Email Newsletter for the company that reduced the time per email from 15 minutes to 3 minutes, and allowed the company to send out over 2000 emails per hour.

EDUCATION

Computer Science
Minor in Media · University of Alabama · Tuscaloosa, Al · 2025 · Current: 3.02

The University of Alabama Computer science coursework has included Computational theory and high level mathematics. This has been my foundation throughout studying software engineering.

COURSEWORK

TrueCoders
Birmingham Al · 2023 · C# , SQL

Working individually and in a team environment to complete large scale projects. This course was taken in conjunction with a full time work schedule and while enrolled in College full time. This extended workload that I took on gave me great time management skills and the ability to manage multiple different assignments all simultaneously.

INVOLVEMENT

Parachute Rigger
Marine Corps · March 2021 - Present

· Demonstrated exceptional attention to detail and adherence to safety protocols in the rigging and packing of parachutes.

- Conducted regular inspections and maintenance of parachutes and related equipment to ensure operational readiness.
- Collaborated with team members to plan and execute parachute operations, ensuring the safe delivery of personnel and equipment.
- Developed effective communication and teamwork skills in a high-pressure, mission-critical environment.
